Oxdale Products Ltd
20 - 21 Foxwood Road, Off Sheepbridge Lane,
Chesterfield, Derbyshire
S41 9RF

Introduction

OXDALE PRODUCTS

Oxdale Products was founded in 2008 in Chesterfield, Derbyshire.

Initially, Oxdale focused on the development and production of one product - the TM400 log splitter. Following the success of the TM400, which remains one of our most popular products selling over 10,000 units nationwide, Oxdale expanded their range and now manufactures more than 14 different models of log splitter. We have also developed a range of grassland management and forestry machinery.

All our machinery is manufactured at the Oxdale factory in Chesterfield, exclusively using British steel. The machinery then goes on to be stocked at a wide range of dealers all over the country. We aim to make our range of products both high quality and affordable, suitable for both the commercial and domestic market.

All oxdale products carry a full 12 month guarentee. (This does not apply to special one off builds or machinery we do not manufacture)

All quotations & orders accepted by Oxdale Products Ltd are subject to the following terms of business:

Orders must be forwarded by email. No responsibility is accepted by Oxdale Products Ltd for goods supplied incorrectly if a written order is not recieved.

Credit accounts are to be settled in full by the end of the month following the month of invoice. Overdue accounts will suspended deliveries.

We regret that no goods can be returned without authorisation and any such returns will be subject to a handling charge of 10% of the invoiced price. All goods shall remain the property of Oxdale Products Ltd until the customer pays in full. While the goods remain in our ownership, the customer shall keep them and insure them against damage, destruction and theft for their full value and return them to Oxdale Products Ltd on demand.

New equipment is warranted for 12 months. Warranty does not cover mileage or replacement of consumable or wearing parts

Tractor Mounted Log Splitters

TM400

TM400 Big Base

Axehead

All of our log splitters are designed, built, and tested in the UK. Suitable for tractors which range from the compact models to the higher horsepower machines.

Easy to split logs at waist height and ground level. Fits to a standard rear, three-point linkage but can be adapted to fit a front three-point linkage if required.

For added safety, all hydraulic pipes are covered in anti-burst lagging.

Both hands are required on the lever to operate the ram. The big base model also features an enlarged 700mm working base.

OXDALE PRODUCTS

PTO LOG SPLITTERS

PTO400

Our PTO range offers a self-contained hydraulic system which is ideal for older or smaller tractors that have no free-flowing hydraulic system.

Will fit to most tractors where a PTO drive is available.

The PTO400 features a 10 tonne splitting force which is powerful enough to cope with the most demanding of splitting jobs.

For added safety, all the hydraulic pipes are covered in anti-burst lagging and both hands are required on the lever to operate the ram.

The platform is self-cleaning of large logs with a full width of 700mm, available in both standard or big base.

PTO400	18"	10	320	1 & 2	85kg	1320mm

OXDALE PRODUCTS

Tractor Mounted Log Splitters

TM600

Head and Spool Block

The TM600 is a high capacity log splitter powerful enough to cope with the most demanding of splitting jobs.

The splitting wedge is specially forged, hardened and has a double chamfer to give the best splitting action available on the market.

For added safety, all the hydraulic pipes are covered in anti-burst lagging and both hands are required on the lever to operate. When the lever is released the ram stops, there is no auto return on our machines. This allows different sized height logs to be split quickly without having to do a full auto return.

Model	Maximum Log Length	Maximum Ton. Cap.	CAT. Linkage	Min.Oil Flow Rate	Machine Weight	Machine Height

OXDALE PRODUCTS

PTO LOG SPLITTERS

PTO600

The PTO600 has been designed to split logs up to 24" in height. It is a self-contained hydraulic system which is ideal for older tractors that have no free-flowing hydraulic system.

Suitable for 35hp tractors and above. Will fit to most tractors where a PTO drive is available.

Larger base allows for easier manoeuvrability of the larger rings of wood.

OXDALE PRODUCTS

ENGINE DRIVEN LOG SPLITTERS

SE400

The SE400 is an engine driven log splitter powered by a Honda GX200 engine.

This machine is fitted with a Dual speed hydraulic pump which when combined with the unique Oxdale Axe head allows a 10-ton capacity ram to be fitted which makes the splitting operation very quick and efficient.

The log splitter has been designed to be easily wheeled by hand to the location where it is to be used.

Capable of splitting logs up to 18 inch high and is not limited to the width of logs it can split.

The SE400 requires 15litres of ISO 46 hydraulic oil.

Model	Maximum Log Length	Maximum Capacity	Machine Weight	Machine Height	Honda Engine Size

ELECTRIC LOG SPLITTERS

Electric Range

All of our log splitters are designed, built, and tested in Britain.

The electric range features a single-phase electric motor and equipped with a standard household three pin plug.

Dual speed, twin pump technology. Automatically switches over under load to supply maximum speed and splitting performance at all times.

Indoor or outdoor use. Pneumatic wheels for ease of manoeuvrability.

The E400D model features a splitting platform 31" high

Model	Maximum Log Length	Maximum Ton. Cap.	Machine Weight	Machine Height

OXDALE PRODUCTS

Tractor Mounted Log Splitters

TM1000

Axehead

The TM1000 log splitter has been designed for the professional user who splits logs into billets.

This high capacity splitter is for use with medium to large sized tractors and can easily split logs up to a maximum height of 36", no diameter limitations.

The 1000 range has a 16-tonne capacity ram fitted with our unique forged and hardened axe head to give the best splitting action available on the market. For added safety, all our hydraulic pumps are covered in anti-burst lagging and both hands are required on the lever to operate the ram.

OXDALE PRODUCTS

CUSTOMISING LOG SPLITTERS

Oxdale Products are also able to provide adapted and custom made log splitters. Your tractor mounted log splitter doesn't need to be ran behind a tractor. We can modify the log splitter so that it can be connected to any machine that has an external hydraulic supply.

E.G - Avant Loaders, Bobcats, Telehandlers (Manitou, JCB, John Deere etc.), Mini Diggers (Dual tracks, Mini 360's etc.).

If this is something you require - please do not hesitate to contact us to discuss your requirements and obtain a quote.

OXDALE PRODUCTS

CHIPPERS

3" Petrol Chipper

3" PTO Chipper

2" Petrol Chipper

Chippers

The Delmorino 3" Chipper is available in a Tractor PTO model or with a Honda GX390 petrol engine.

This bio shredder is both reliable and safe. It surpassed all tests to assure the safety of the operator and came out with top marks for its shredding performance. As it denotes in its name, the Delmorino 3" chipper will chip/shred material up to 3" diameter.

Its gravity fed wide chute allows a wide range of material to easily pass through. The frame is made from high strength steel.

The Delmorino 2" chipper is fitted with a Honda GP200 engine. This bio shredder / chipper is suitable for the semi-professional user.

Like the 3" chipper, the 2" is very safe and reliable and has surpassed all tests to assure the safety of the operator.

OXDALE PRODUCTS

CHIPPERS

4.5" Argo Chipper

New for 2021, the Argo is a gravity fed chipper with high level discharge at 1.5m and is 360° adjustable.

It features a high strength, anti-vibration steel frame which is laser cut, machine bent and welded by robot.

It makes use of a V belt transmission with tensioner and comes complete with 2 adjustable counter blades designed to be easily replaceable.

It has a 3-point hitch CAT 1 & 2 and a CAT 4 PTO shaft. It features 4 reversible chipping blades mounted on a ventilation disc and are easy to replace. The chipper disc has steel bearing supports and is electronically balanced.

OXDALE PRODUCTS

SCORPION CHIPPER

A PTO driven professional chipper with high level discharge, it takes logs up to 5" in diameter.

Suitable for tractors 20-60hp.

Features a no-stress system; automatically adjusts the speed of the feed rollers to deal with larger amounts of material and reduce stress on the tractor.

Discharge chute stands 2m high and will rotate 360°.

Comes supplied with a CAT 4 PTO shaft.

Cuts with 4 reversible blades of high resistance steel, mounted on a ventilated disc. Easy access to blade holder for easy maintenance.

Blade holder disc has rotor with steel bearing supports and is electronically balanced.

Reliability and safety are the key elements of this machine.

OXDALE PRODUCTS

PTO SAW BENCHES

PTO Saw Bench

The 700mm diameter tungsten tip saw blade provides fast and efficient cutting.

It cuts logs up to 12" in diameter and is fully guarded. It comes equipped with a swinging cradle, emergency stop lever (for effective and safe operation) and a PTO shaft as standard.

We have redesigned the guards to prioritise the safety of the operator.

OXDALE PRODUCTS

SAW BENCHES

Electric Saw Bench

The 600mm tungsten tip saw blade is capable of cutting through logs up to 10" in diameter.

It features a single phase electric motor which is designed for safe and effective operation.

A single phase, 16 amp power supply is required to power this saw bench.

OXDALE PRODUCTS

ROLLERS

Garden Roller

The garden roller is a smaller, more manageable water ballasted roller. It has a diameter of 16" and comes with a 30mm shaft and greaseable bearings which makes it ideal for smallholdings and gardens.

It can be towed behind a compact tractor or ATV. When empty it is easily manoeuvrable by hand. It is practical to store and is available with a pin or 50mm standard ball hitch.

CHAIN HARROWS

Trailed and Mounted Chain Harrows

Our range of harrows are designed to cover all applications from large farms, small holdings, equestrian venues and sports fields.

Harrowing removes dead thatch lifts vegetation up and levels any mole hills. It allows air movement and root aeration which helps the soil to breathe and improves water infiltration. It reduces disease by exposing fungi and bacteria to sunlight which is essential for the health of the pasture.

All our harrows are designed to pull the tines at the correct angle so that the ground is completely covered.

OXDALE PRODUCTS

GRASSLAND EQUIPMENT

Fixed Weeder Tines

The Oxdale Fixed Weeder grass harrow has revolutionised grass harrowing in recent years, larger working widths, more adjustment and aggressive spring tines mean that a better finish can be achieved faster and at a lower cost.

The fixed weeder comes in widths from a very handy 4ft to a manual folding 12ft, all fitted with 8mm tines. The machines are designed for strength without the need for high horsepower.

The weeder can also be used with the Oxdale Seeder Attachment.

Width	Tines	Rows of Tines	Min. HP	CAT. Linkage

6'	31	3	15	1 & 2
8'	41	3	20	1 & 2

OXDALE PRODUCTS

GRASSLAND EQUIPMENT

12FT Folding Weeder Tines

Suitable for tractors of 30hp and above.

Four rows of 8mm tines for optimum ground clearance.

Fold to a width of 4ft (1.2m) making them ideal for narrow gateways and road travel.

Can be used with the seeder attachment.

Width	Tines	Rows of Tines	Min. HP	CAT. Linkage
12' Folding	72	4	30	1 & 2

For product demonstrations visit www.oxdaleproducts.co.uk

OXDALE PRODUCTS

SEEDER

Seeder Attachment

Can be fitted to all weeder tines or any vehicle with a 12v power supply.

62.3L capacity hopper with stainless steel blades and a 12v motor.

Variable speed control to control spread and consistency

Spread width ranges from 5ft - 45ft.

Stimulates old grass growth to improve yields.

Creates a completely new ley.

Can be used to spread seed, fertiliser, slug pellets or granular pesticides, herbicides & fungicides.

Tel: 01246 529020

Email: sales@oxdaleproducts.co.uk

For product demonstrations visit www.oxdaleproducts.co.uk

OXDALE PRODUCTS

FENCING EQUIPMENT

Post Hole Borer

Suitable for use with all tractors up to 60hp.

Available with 4", 6", 9" or 12" augers. Spare auger tips and shares also available.

Capable of boring holes up to 3ft/0.9m deep. Maximum PTO input speed of 540rpm. Shear bolt protected.

OXDALE PRODUCTS

FENCING EQUIPMENT

Post Kocker

Suitable for use with all tractors.

60kg (max) weight block which can be reduced by removing leaves. Bolt on side mount brackets are also available should you wish to use the post kocker with a loader or digger.

Requires hydraulic spool connection. Can be used with CAT 1 or 2 linkage.

Equipped with a levelling adjuster and post holding plate.

For larger tractors, Oxdale offers an extension kit (pictured left). This extends the distance between the tractor and post kocker to allow the machine to function with larger tractors.

OXDALE PRODUCTS

GRADER BOXES

Compact Grader Boxes

An essential tool for levelling ground. The compact grader is ideal for use on hardcore tracks, spreading soil and rubble.

The tines loosen the material, which is then dragged into the box, dropping out where the ground is lower leaving a level surface.

Width ft	No. of Rippers Legs	No. of Blades	Wall Thickness	Weight kg	CAT Linkage

OXDALE PRODUCTS

GRADER BOXES

Medium Duty Graders

New for 2021. This grader was developed for users with medium HP tractors.

The medium duty grader will stand higher than the standard with 10mm thick steel sides. The back of the machine is made from one piece of sheet metal with added strengthening.

There is a full width box section crossmember with adjustable tines to loosen the surface.

Del Morino

OXDALE PRODUCTS

ROTAVATORS / TILLERS

Del Morino 105 / 125 / 145

The Delmorino Rotavators are an easy to use and a powerful piece of machinery used to carry out all the functions related in various working environments in all types of ground whatever its composition (sandy soil, medium mixture or clay).

The innovative rotor production process is the main guarantee of the quality of our rotary tillers. Everything is taken care of in the smallest details starting from the choice and quality tubes, continuing with the machining of the hub seats performed with a CNC boring machine

The rear baffle (back door) besides preventing any dangerous hurling of stones and other foreign bodies, makes a clod mincing function, the more emphasized the more the baffle is closed.

ROTAVATORS / TILLERS

Del Morino 186 URT-HF

This machine demonstrates Del Morino's experience in both the quality of construction and the final result in the field. It is suitable for the professional farmer working in open fields.

Suitable for heavy work

Universal PTO shaft: CAT 5, with slip clutch

Cast iron gearbox rated up to 70 PTO HP

6 hoes per flange

Chain driven ASA 100 in oil bath with automatic tensioner

Automatic tensioner, adjustable skids

Reinforced 3 point linkage frame

MOWERS

Del Morino Finishing Mower

The Del Morino finishing mower with belt drive is suitable for 12-70hp tractors with CAT1 three-point linkage. The cast iron gearbox delivers 540mm

This mower is supplied with a universal PTO shaft CAT 2. It has three spindles each with single blades for the 120/150/180/215 models.

The machine has rear discharge with an optional mulch system and adjustable height pivoting wheels 20-90mm.

FLAIL MOWERS

106 Standard Headstock

Del Morino Semi Offset Flail Mower

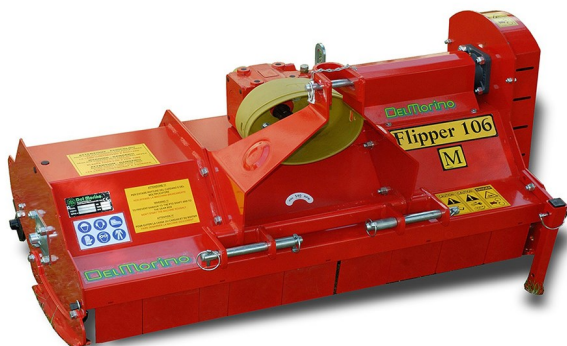

The Del Morino semi offset flail mower is suitable for tractors which are 12-30hp with CAT 1 three-point hitch and manual side shift. It can work close to hedges and under trees. It can be used to cut grass, weeds, and bushes.

The mower is supplied with a universal PTO shaft CAT 2. It has an aluminium gearbox with an integrated free wheel device, 2 belt transmission with an adjustable tensioner, adjustable rear roller 3 position and a rotor with metal spatula flails.

The 106 comes with a standard headstock.

FLAIL MOWERS

Levante Flail Mower

The Levante flail mower is suitable for 80-120hp tractors with CAT 2, 3-point linkage. The gearbox is reversible and has a pass-through shaft.

The mower is supplied with a universal CAT 4 PTO shaft. It produces 540 rpm, has a reinforced, reversible frame for front or rear mounting and a hydraulic side shift. The transmission has 4 heavy duty belts with adjustable tensioner, a rotor with hammer blades, rotor supports and bearings outside of the mulching chamber.

It also comes equipped with a dual shredding blade for extra mulching, adjustable skids and an adjustable rear roller.

FLAIL MOWERS

Del Morino Levante Super

New for 2021. The Levante Super has all the characteristics as the Standard Levante. This machine is suitable for heavy duty use on hard and uncultivated soils for the professional user.

Its honeycomb structure with high thickness cover and walls (side walls 10mm) allows the user to cut grasses, bushes, stumble, reeds and even prunings of big diameter saplings - getting good results. For better shredding/cutting and strength, a full width shredding blade is fitted underneath the top of the hood.

It has a hydraulic side shift adjustment which enables the user to not just shift the machine to the left or right but also have optimal control on embankments and slopes. This side shift adjustment makes the machines highly manoeuvrable and can be used as an in-line flail mower behind the tractor, or fully offset to the left, with a cutting angle between -50 and +90 degrees of horizontal. This means that verges, banks, ditches or even the side of low hedges can be maintained with a single machine.

MOWERS

DMK Topper

The DMK range of grass toppers are a strong, simple and efficient way of keeping grass areas neat and tidy with a good performance cut. They are very economic to purchase and maintain.

The machine is connected to the tractor with a 3-point hitch which can be used in an 'off-set position' to make it easier to use under trees and along wall sides.

A shear bolt protection is fitted to the PTO shaft (DMK100 & DMK120) and slip clutch on the DMK180.

The cutting height ranges from 1.2" and 8". A cast iron gearbox rated up to 75hp is fitted as standard which, in turn, has a direct drive to a single rotor with two swinging blades

Model	HP	Working Width	Weight Kg	Cutting Height inch	No. of Blades	RPM
DMK 100	12-80	40	143	1 - 4	2	540
DMK 120	12-80	48	176	1 - 4	2	540
DMK 180	12-80	72	300	1 - 4	2	540

SLITTER AERATOR

Slitter

The Oxdale Slitter relieves compaction and promotes a healthier root system. It can reduce the need to purchase expensive artificial fertiliser.

Alongside this, the Slitter improves growth and quality of the grass,

It improves drainage whilst simultaneously maximising fertiliser input and eliminating slurry run off.

Range	Width	No. of Blades	Cat. Link	Weight kg	Ballasted Weight kg
